

One source keyframe

Null-edited negative control ($\nu=0$)

Same editor • Same source-keyframe
anchor • Null edit instruction
(no trigger requested)

Generator-matched construction

- Same image editor
- Same resolution and inference settings
- Same source-keyframe anchor
- Independent stochastic outputs
- Requested edit instructions differ; stochastic variation may also occur

Traffic cone
($\nu=1$)

Traffic barrier
($\nu=1$)

Umbrella
($\nu=1$)

Ladder
($\nu=1$)

Bollard
($\nu=1$)

Potted plant
($\nu=1$)

Teddy bear
($\nu=1$)

Roadside litter
($\nu=1$)

Red balloon
($\nu=1$)

Football
($\nu=1$)

Fire hydrant
($\nu=1$)

Rose
($\nu=1$)

All 13 variants are anchored to the same source keyframe and remain in the same scene-level data split.

The null-control and trigger-positive variants are independent outputs of the same editing pipeline.

Red rectangles are added only for visualisation and are not provided to TAM-VLM.
